

## ***Smart 9601 - marketing specifications***

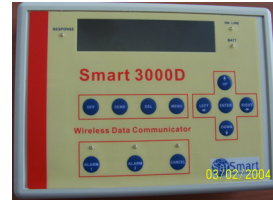

The *Smart 9601* is the optimal solution for those who are seeking remote tracking and monitoring of their assets. Specifically designed for operating with the Iridium low-earth orbiting satellite messaging network, the *Smart 9601* is not limited to spotty coverage areas that plague cellular-based telematics products. It provides 2-way messaging between the mobile operator and the control center and Email capability.

### ***Smart 9601 Features:***

- *Satellite-based telematic capabilities.*
- *Web-based customer interface accessible from any Internet browser.*
- *No Infrastructure costs.*
- *Unique software which enables text messaging from/to the Smart 9601.*
- *User interface that enables users to send programmable alerts at the push of a button; automatically sends vessel/truck ID and location*
- *Displays acknowledgements when alerts received by emergency dispatchers*
- *Easy installation -- just connect Iridium & GPS antennas & DC power*
- *Built in keyboard and display*
- *Built in safety and security functionality*
- *Interface to GPRS for dual mode capability (Optional )*
- *Compact unit 207x135x48 MM*

## ***Smart 9601 Solutions***

- *Anti-Theft: Connect to a vehicle's intrusion sensor; automatically sends alert(Optional).*
- *GEO fencing – Over speed, outside defined route, Inside restricted area, outside permitted are, over speed, stop /start moving.*
- *Events log.*
- *E-mail: Send & receive short e-mails to/from any email recipient & SatSmart's web site (Optional).*
- *Remote Monitoring (SCADA): Connect to a vehicle's sensors for monitoring systems remotely(Optional)*
- *Location-Based Content: Retrieve weather reports, news, etc. on a laptop.*
- *Dual mode – Satellite and Cellular with automatic switched over (Optional )*
- *Two – Way communication by using our integrated keyboard and display*
- *Navigational Services:*
  - *Track vehicle on demand from SatSmart's web site*
  - *Receive automatic alerts if vehicle is off course*
  - *View vehicle position on a variety of digital maps*

## ***Smart 9601 Specification***

- *12/24 volt input*
- *CAN bus / J1708 interface to car/truck computer ( optional)*
- *10 parallel analog/digital connections (optional)*
- *External Laptop connection*
- *RS232/ RS485 interface ( RS485 optional)*
- *GPS module*
- *LCD display 2 lines 16 character each (5x8MM per character).*
- *Functional keyboard*
- *Dimension 207x135x48 MM*
- *Operating temperature –10c to + 55c*
- *Storage temperature – 20c to +65c*
- *Internal GPRS module ( optional )*
- *External back up battery (optional )*
- *GPRS antenna (optional )*
